What is this *Cloud* you speak of?

The *Cloud* Benefits

- Cloud is simply an external technology service you would access over the internet to store data, run applications or some sophisticated service - e.g. Office 365.
- You can subscribe to these services instead of building and maintaining yourself.

How does video conferencing fit in?

Overview

Benefits

- All you need is an internet connection and a video-enabled device – e.g. laptop with webcam or a smartphone.
- The cloud will connect what you have already.
- Provides every employee access to video meetings.
- Benefits include;
 - Flexibility & Mobility
 - Always up-to-date
 - Scalability
 - Affordable
- Decrease travel time and carbon footprint

- 100 participants
- 40 min group meetings
- Can integrate partly through Teams (paid)
- Private chat in meeting
- Full control of participant microphone & video
- Can remove participants
- Lock room
- Multiple-screen share
- Raise hands
- Breakout Rooms
- Co-annotation Screen share
- Airplay iphone/ipad

Home Requirements

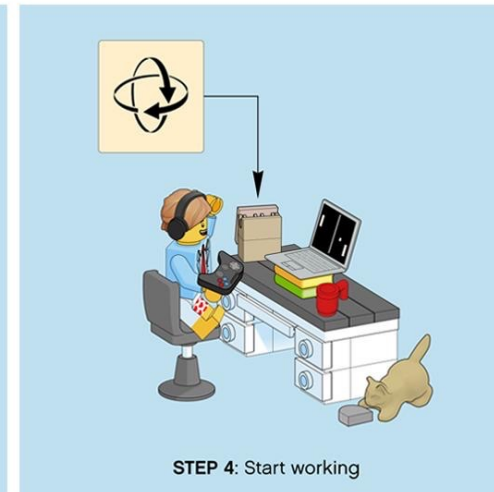

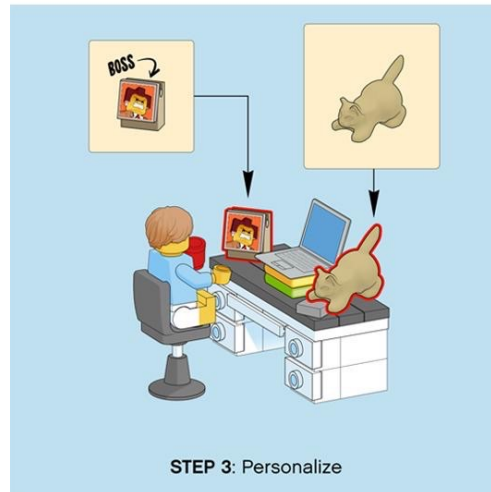

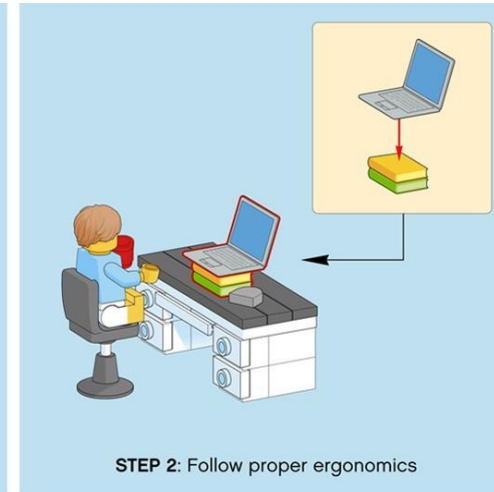

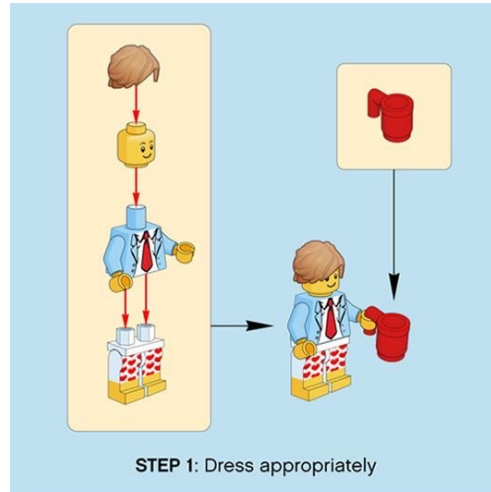

Home Requirements

- Stable Wi-Fi and internet connection
- Good audio and webcam – possible use a separate headphone/mic
- Separate monitor and keyboard (optional)

Home Office Tips

Office Requirements

Rooms

A video conferencing solution for every meeting space.

Small

Mini spaces and huddle rooms are among the fastest-growing meeting room types today as businesses look to modern collaboration technologies to make better use of their office real estate. The small design — seating up to four people — is ideal when you need a quiet place to join a video meeting or collaborate on a project

Ideal Room Size

Up to 6' x 6'
Seats up to 4

Display

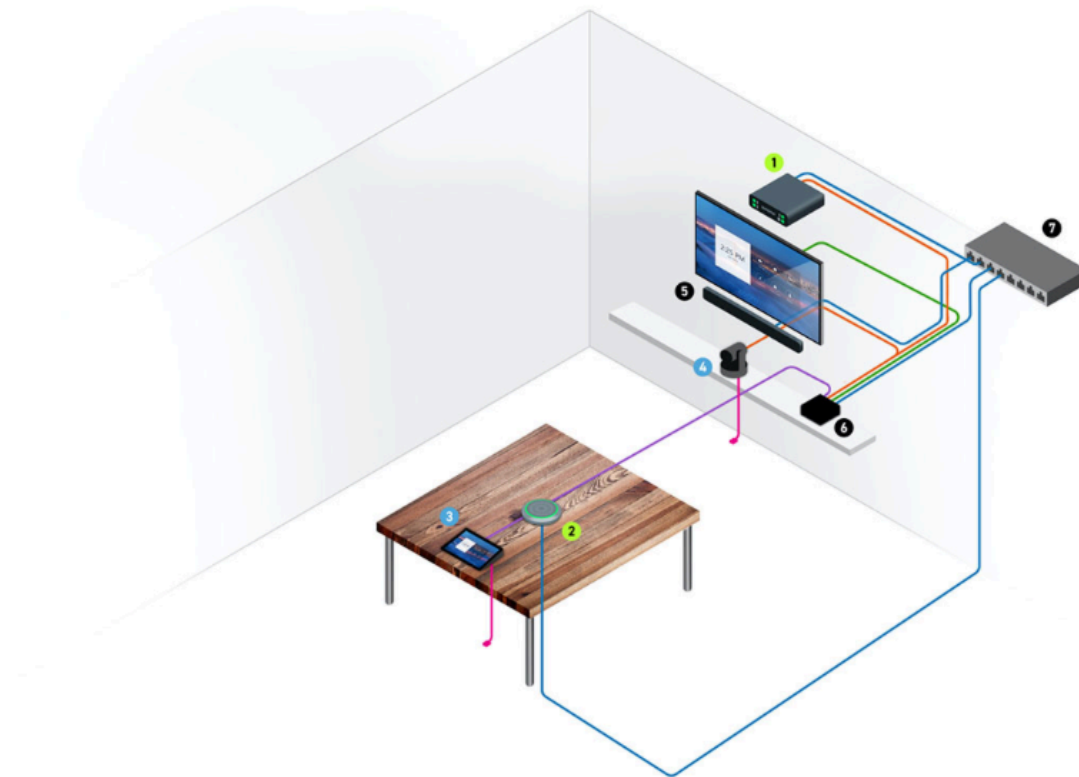

Single Display

Small Room

- 1 P300 Digital Signal Processor
- 2 MXA310 Table Array Microphone
- 3 Zoom/MST Tap Base Bundle
- 4 Rally Camera
- 5 Soundbar
- 6 PC
- 7 Switch PoE+

CONNECTIVITY

- Ethernet
- USB
- HDMI
- Logitech Strong USB
- Power

Medium

Small meeting rooms are perfect for spontaneous collaboration, and your room technology should enable it. They are designed to deliver effortless video conferencing for an unparalleled small meeting room experience with easy installation and simple plug-and-play functionality.

Ideal Room Size

Up to 10' x 10'
Seats up to 6

Display

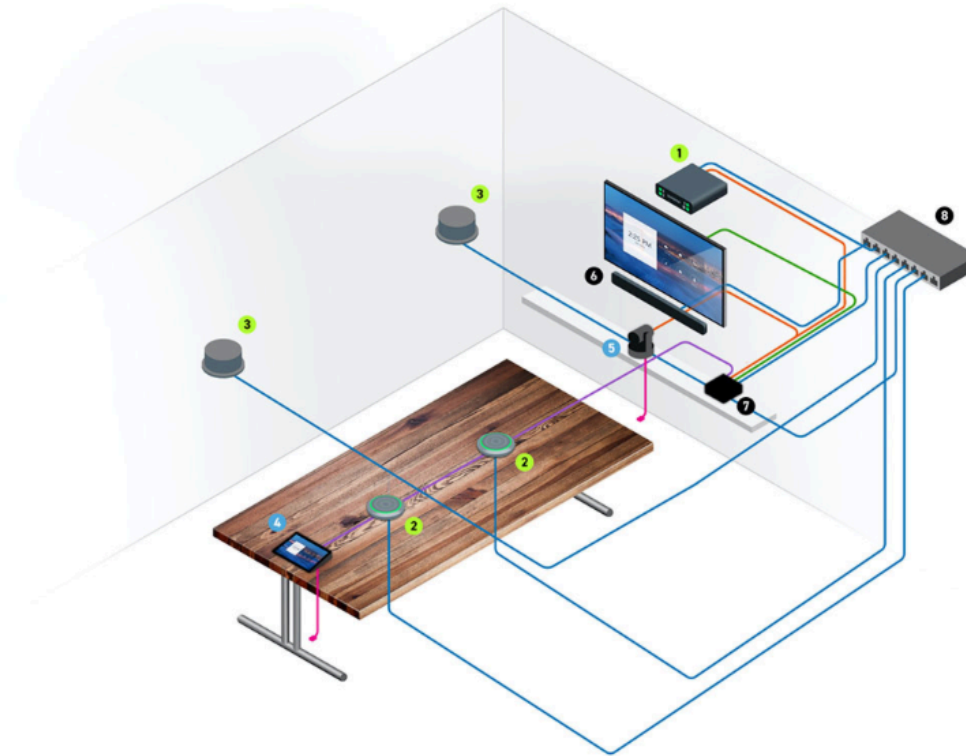

Single or Dual Display

Medium Room

- 1 P300 Digital Signal Processor
- 2 MXA310 Table Array Microphone
- 3 MXN5-C Networked Loudspeaker
- 4 Zoom/MST Tap Base Bundle
- 5 Rally Camera
- 6 Soundbar
- 7 PC
- 8 Switch PoE+

CONNECTIVITY

- Ethernet
- USB
- HDMI
- Logitech Strong USB
- Power

Large

Conference rooms come in many different sizes and shapes, but their purpose is always to enable relationship building through consistent, face-to-face conversations. A dedicated presentation screen, high-quality camera and audio engineered for greater voice pickup are essential for large meeting spaces.

Ideal Room Size

15' x 30'
Seats up to 30

Display

Dual Display

Large Room

- 1 P300 Digital Signal Processor
- 2 MXN5-C Networked Loudspeaker
- 3 MXA910 Ceiling Array Microphone
- 4 Zoom/MST Tap Base Bundle
- 5 Rally Camera
- 6 PC
- 7 Switch PoE+

CONNECTIVITY

- Ethernet
- USB
- HDMI
- Logitech Strong USB
- Power

Extra Large

Meeting spaces like auditoriums, classrooms and multipurpose big rooms have so much collaborative potential. They yearn for a video conferencing solution but in a big, flexible way. Multiple AV inputs and outputs are necessary to connect multiple devices (cameras, laptops, DVRs, microphones, etc.).

Ideal Room Size

50' x 50' and larger
Seats 30+

Display

Two active output sources

Training Room

- 1 P300 Digital Signal Processor
- 2 MXN5-C Networked Loudspeaker
- 3 MXA910 Ceiling Array Microphone
- 4 Zoom/MST Tap Base Bundle
- 5 Rally Camera
- 6 PC
- 7 Switch PoE+

CONNECTIVITY

- Ethernet
- USB
- HDMI
- Logitech Strong USB
- Power
